An Explosive Failure Mode of an Arrester

This example is a real event where fortunately no one was hurt, but certainly could have.
Some where in North America a vintage porcelain distribution arrester failed
Internal part were propelled over a 100 meters into the cab of this parked truck.
The arrester block went directly through the passenger side window.
Smashed the steering wheel

Landed on and burnt the floor
Molten Silicon Carbide Block from Explosive Porcelain Arrester Failure Mode
